

# ELECTRIC WIPER KITS- CARS

These kits are designed and engineered to fit your 1930's thru 70's American Car or Truck, fitted with vacuum operated wipers & in some cases OE electric. The motor is a heavy duty two speed, 12v self parking unit. There are some solutions for 6v applications. Most kits have a rotary switch with a built in screen-wash electric switch [push to activate] [check before you buy], a wiring harness & installation instructions. Each kit is designed as a bolt in replacement for the original vacuum/electric unit, ready to connect to the O.E.M. wiper transmissions or cable drums. Some kits are complete with nylon bushings to replace the rubber grommets in the wiper transmission linkage arms. Generally, these kits clear the std cowl vent & air-conditioning. Switch extensions are available for some models to enable the std original knob to be used. The more expensive kits are a complete conversion to dual wipers instead of single.

This example is for a 1957 Ford-

**\* SWITCH SHAFT EXTENSIONS \***

A switch extension can be used on some models, enabling the use of the original knob. Look for an asterisk \*, or Please ask.

- BYNE14010** Ford-3/16" shaft 2spd sw **£36.64**
- BYNE14014** Ford 1949-50 2 spd sw **£24.14**
- BYNE14011** GM-1/4" shaft 2 spd sw **£33.00**

**BUICK [GM]**
