BODY MOUNTS

Energy Suspension Polyurethane performance components, are made in the USA. Energy use a material called “Hyper-Flex”, which is the result of 20+ years of experience. Careful selection of material firmness [durometer] is used for each specific application on the vehicles suspension & frame. Hyper-Flex components do not rot or deteriorate from exposure to oils & under-car chemicals or atmospheric conditions, like smog & ozone. Handling & steering response is vastly improved over standard, soft bushes. Ride could be stiffer.

HEIDTS FRONT SUSPENSION

Heidts were one of the first companies to make alternative crossmember based suspension assemblies, based on the 1974-78 Mustang II front suspension. Up until a few years ago, the Mustang II could be readily found in scrapyards, and it was a simple matter to "remove" the front suspension, and modify it to suit ones Hotrod. Nowadays, these cars are getting a bit thin on the ground. This is where Heidts comes in [23 years in business], manufacturing cross members to fit many classic cars & trucks. If you have the suspension parts from a Mustang II, then these will fit the crossmember. Otherwise, you can buy all new components, with many different options. The Heidts front suspension design, follows faithfully, the design used by Ford Motor Company. This is because it is technically a very good design. Ford got it right first time with this design, eliminating bumpsteer, and including built-in anti-dive into the design. Some of the other Mustang II based designs do not have these features. Hotrods & Custom/Street cars built these days, need to be safe, as more & more families have become involved, giving us a much greater responsibility. The car needs to handle and brake in safety, from speed. It is no good anymore having a car that will do 200mph in a straight line, but has poor brakes & suspension. Tailgating the family in a 2019 Vauxhall Insignia on the M1 at 85mph, in your 1500bhp twin turbo '34 Ford coupe, is not a good idea, unless you have brakes the equal of his. The Heidts front suspension cross-member is made in the USA, not China, and it is beautifully made, a work of art. I visited the Heidts factory, just north of Chicago, and was very impressed with the high quality of their work. I look forward to fitting one of these kits to my own car in the future.

BYAJW1055 Pump kit SBF lo-flo £364.87sp

The above 2 pump kits are lo-flo & comes with brackets

BYAJW980 Steel brack' Pont 400 £45.19sp

Steel brackets are for **BYAJW845** pump only

AJM736 Pump & bracket kit £406.98

Mustang 65-70 302 etc Small Block, Saginaw pump

MUSTANG POWER RACK CONVERSION KIT

Mustangs can have a bit of "slack" in the "feel" of the steering. They can also leak fluid everywhere. Complete with pump, hoses and connection parts for your steering column. You can tell an early '67, it does not have a "rag-joint" connection to the stg box.

BYAJW990 Mustang 65- 66 Small Blk £1581.58

BYAJW1020 Mustang early 67 [no rag joint] £T.O.

BYAJW995 Mustang late 67-70 [has a rag joint] £T.O.

BRAKES

MUSTANG FRONT 11" DISC BRAKE KITS 1964-69

For Mustang V8- 5 stud OEM wheel cars that originally had drum brakes from Ford. Callipers are single piston. A disc brake servo will be required to create enough pressure. [Disc brakes require more line pressure than drum brakes to function efficiently].

Picture shows an AJW1045 kit, for one wheel. Kits contains all the parts needed for two wheels.[1 car]

BYAJW1045 V8 64'-69 w/oem wheels **£830.40**
Will also fit 1970 if appropriate wheel brgs used.

REPLACEMENT DISC PADS FOR BYAJW1045

Note: There is not just one type:

BYD159 Disc pad set for BYAJW1045 **£29.28**

MUSTANG 1964-66 DUAL M/CYLINDER & SERVO

This is a complete dual master cylinder together with an 8" dual diaphragm brake servo or booster. Will work with OEM drum/drum *** or aftermarket disc/drum. Will work with automatic or manual transmission.

*** For use with drum/drum the proportioning valve must be removed

BYAJW1030 1964-66 m/cyl & servo- **£498.56**

MUSTANG 1967-70 MASTER CYLINDER+SERVO

This is a complete dual master cylinder together with a 7.5" dual diaphragm brake servo or booster. Will work with OEM drum/drum or aftermarket disc/drum. Will work on a car that left the factory with either a manual or automatic transmission, & non power brakes. OK with V8 or 6cyl.

BYAJW920 1967-70 m/cyl & servo **£498.56**

MUSTANG 1967-69 8" SERVO only

This is an 8" dual diaphragm brake servo or booster. Will work with OEM drum/drum or OEM disc/drum. Will work with automatic or manual transmission. Must have originally had power brakes from Ford..

BYAJW950 1967-69 servo replaces OE ... **£T.O.**

ADJUSTABLE BRAKE PROPORTIONING VALVE

An adjustable brake proportioning valve is used to balance front and rear brake pressures, especially in disc/drum combinations.

BYAJW445 Adj' brake proportioning valve **£74.71**

COMPETITION ENGINEERING REAR SUSPENSION

C.E. LADDER BAR CROSSMEMBER KIT

Designed to provide a sturdy mounting point for the ladder bar front rod-end. Capable of withstanding the abuse of a racing suspension while adding strength to the chassis. The 54" wide bar also acts as a rear prop-shaft loop. Includes brackets & bolts. Welding required.

BY2019 Ladder bar crossmember **£88.55**

CE DIAGONAL LINK

Eliminates side to side housing movement. Superior to the Panhard bar for eliminating sway in ladder bar & four link suspensions. This bolt on diagonal link can be used with the CE Ladder Bars, Ladder Links & Std 4-links with 3/4" mounting holes. Made from 3/4" x .156" mild steel tube. Kit includes rod ends & mounting hardware.

BY2052 Bolt on diagonal link 36.5" **£125.22**

CE LADDER LINK [BARS]

Allows the racer to fine tune the suspension without removing the bar from the car. Pivoting lower adjusters eliminate the bind found in some bars. 1" x .156" DOM tube. Forged solid rear rod ends. 33.5" overall. High quality alloy spherical front rod ends. Black powder coated. Welding required.

BY2005 Ladder link kit inc ends **£478.84**

CE 4-LINK KIT

Offers better adjustability over a ladder bar suspension for increased performance. By locating the bars with the various mounting holes in the brackets, you can create an instant centre that is correct for your car. 17-1/4" long, 1" diam x .156" threaded links. 3/16" thick brackets. Includes 8 chrome-moly rod ends. Inc' hardware. Requires welding.

BY2017 Rear four link kit **£318.83**

CE ROD ENDS- 3/4" HOLE

Static radial load capacity- low carbon steel- 14,290lbs. chrome moly steel- 28,090lbs.

BY6011 Low carbon steel 3/4" RHT **£15.98sp**

BY6012 Low carbon steel 3/4" LHT **£15.98sp**

BY6130 Chrome moly steel 3/4" RHT **£6.75sp**

BY6131 Chrome moly steel 3/4" LHT **£26.81sp**

CE PANHARD BAR KIT

Eliminates side to side rear axle housing movement within the chassis. Keeps your tyres from rubbing the wheel openings, making sure you get down the track in a straight line. Perfect for street driven vehicles. 30" tube can be trimmed to fit. Includes gusseted mounting brackets & rod ends. Hardware & instructions included. Welding required.

BY2037M Panhard bar kit **£173.12**

CE LOWER COIL-OVER SHOCK MOUNT KIT

Provides a solid adjustable mounting point for coil over shock absorbers. Fits housings with 3" OD axle tubes. Has 6" of height adjustment in 1/2" increments. 1/4" thick housing brackets, 3/16" thick shock brackets. Includes hardware & spacers. Welding required. Kit is for qty 2.

BY2047 Lower coil-over mount kit-pr **£80.05pr**

CE UPPER COIL-OVER SHOCK MOUNT KIT

Designed to mount between the rear frame rails Street Rod, Pro-Street, Drag Race application. Includes one 40" long x 1.625" mounting tube, .188" thick mounting brackets, 4 shock mount tabs, 4 shock spacers for older style coil-over shocks and all mounting hardware. Welding required.

BY2046 Upper coil-over mount kit **£50.05**

CE BOLT-ON PROP-SHAFT SAFETY LOOP

Contains the propshaft and prevents flipping the vehicle in the event of a front u/j failure. Manufactured from CNC formed 1/4" thick, 2" wide mild steel. Mounts to the floorpan with four bolts per side. Zinc plated.

BY3028 Safety loop **£81.50**

CE PROFESSIONAL WHEEL-E BARS

Wheelstands may look spectacular but they can actually hurt performance. Although some front end lift is beneficial for weight transfer, excessive lift can slow forward motion. When a car wheelstands upon initial launch, it uses up power that could propel the vehicle forward. This results in slower ET's. Wheel-E-bars are designed to limit & control big wheelstands without unloading the rear tyres. As the rear housing rotates, the natural rubber wheels come in contact with the track. The shock of this contact is absorbed by both the lower aluminium struts & the coil spring upper struts which keep the tyres from unloading. As the housing continues to rotate more & the front end begins to lift, the coil springs on the upper struts start to compress. The more that the springs are compressed, the more force they exert against the housing rotation, eventually overcoming the rising force of the front end and gently pushing it back down. This converts the rotational energy into forward motion, resulting in quicker ET's. Overall length is 44" & the centre to centre mounting bracket distance is 22-11/16".

BY2016 Chrome wheel-e-bars **£579.34**

HEIDTS REAR SUSPENSION

PANHARD ROD FOR HEIDTS 4 BAR

Required for Heidts 4 bar for Classic Truck. Weld on.

BYAJW785 Weld on- 1947-54 Chevy only **£156.71**

REAR ANTI-ROLL BAR KIT

BYAJW440 Chevy 55-57 std suspension only **£213.16**

Above kit has a 7/8" diameter bar with Urethane bushes

AIR-RIDE REAR SUSPENSION Tanks & Pumps-

AIR BAG-Double Convuluted

The capacity of this unit is 2140lbs @ 100psi. Minimum height 3", installed height 4.5 to 5". Maximum height 7". Diameter [inflated] 6.5". 1/4 npt connection.

BY90006781 pr £120.59sp

AIRBAR BOLT-IN 4 LINK 1955-57 CHEVY

This 4 bar unit is designed for the Tri-Chevy. It is complete with upper and lower mounts for "Shockwaves". there are two types of chassis used- one piece section & 2 piece section. We can make up either type.

BY11027199 For one piece chassis £962.76sp
BY90000557 C/member for 2 piece £245.76sp

MANUAL AIR-RIDE SYSTEM

The original RidePro system utilizes a quality solenoid air valve system & dependable electric components to provide simple, & reliable control. Control panel provides simple & accurate inflate / deflate control for each airspring. Vehicles up to 3500lbs. Rise time 3-5 seconds. 327 Thomas compressor, ARV4000 airvalve, 1/4" airline & fittings, electronic control.

BY30154000 Manual system- 3 gallon tank £1027.12sp

RIDE PROe3 AIR-RIDE SYSTEM

The RidePROe3 system provides automatic adjustment with the use of an ECU & digital display. Rise time 3-5 seconds. [BY30334100 3 seconds], 2-327 Thomas compressors, ARV4000 airvalve, 1/4" airline & fittings, electronic control. Relies solely on air pressure sensors for each spring, to adjust the ride height. Three presets. LevelPRO height sensors available also.

BY30334000 RideproE3 >3500lb-3 gal tank £1211.86sp

REAR AXLE

ARP CW & PINION BOLTS

For Ford 9", 7/16" x 0.940". Special hardened, precision ground washers are included. 200,000 PSI.

BY250-3002 Ring gear bolt kit £34.15 kit

DIFF CARRIER GASKET

BYP27807	8" Ford	£7.22
BYP27929	9" Ford	£10.36

INSTALLATION KIT

Motive Gear installation kits provide most of the parts required for a crownwheel & pinion change. Kit contents vary. Ask salesperson for exact contents of the kit you require.

BYR9RMK Ford 9" £118.37 kit

PROPSHAFT PARTS

These U-Joint Girdles provide more bearing surface for the Universal Joint Bearing cap which increases its load bearing capacity. Manufactured from 7075-T6 aluminium with a Anodized finish.

MOROSO -U -JOINT GIRDLES

BY85800	GM 55-82 - U Bolts type	£53.36
BY85810	GM 65-82 - 12 bolt straps	£52.91
BY85860	FORD-Ford 9"	£53.36
BY85800	MOPAR-Dana 60 U-Bolt type	£53.36

SHOCKABSORBERS

These shockabsorbers [RQ] have been designed & tuned for optimum ride quality in Street Rods, Muscle Cars, Classic Trucks & Cruisers. It's the perfect solution for the hotrodder who wants to install it & forget it. They are designed to replace the OEM shockabsorbers & the vehicle must have the stock suspension & ride height. These shockabsorbers are made in Indiana in the USA.
